

€255K of weighted pipeline against a €311K target — close the €56K gap with a targeted Mid-Market intervention this quarter

Day 44 of 91. The forecast is workable. The lever is where, not whether.

- Forecast covers 82% of target, gap is €56K with €22K of recoverable upside in reach

Actuals + Commit + Best Case + Pipeline cumulates to €255K weighted. The gap is material but not insurmountable mid-quarter.
- €22K is the conservative recovery floor from re-engaging 34 stale deals

€654K of Q2-scoped stale ARR × 15% re-engage × 22% historical win rate. Floor, not forecast — and it doesn't depend on net-new pipeline arriving in seven weeks.
- The remaining €34K residual gap is a re-baselining conversation with Finance, not a sales push

Four consecutive quarters under 25% attainment make this a target-setting question, taken up on slide 2.

Mid-Market holds 62% of stale pipeline — the quarterly miss is structural, not episodic

Four quarters under 25% attainment, concentrated in one cell of the market × segment grid. The fix is targeted, not blanket.

- **Four straight quarters below 25% — this is a target-setting signal, not execution**
Q3 25 **33%** · Q4 25 **5%** · Q1 26 **24%** (one rep carried it) · Q2 26 **0%** at the mid-quarter mark.
- **Mid-Market is 62% of all stale ARR — and 57% of open gross pipeline**
€836K stale and €1.04M open in one segment. The pipeline is concentrated where the dies are silent: **UK · Mid-Market alone is 22% of all stale ARR** (€296K, 6 deals).
- **Ask: re-baseline H2 quota with Finance against historical conversion**
Re-baselining doesn't lower ambition — it makes the forecast trustworthy and lets coverage planning catch up to the segment-level reality below.

QUARTERLY ATTAINMENT · LAST FOUR QUARTERS

STALE ARR BY MARKET × SEGMENT				€1.34M total · 34 deals
MARKET ↓ / SEGMENT →	SMB	MID-MARKET	ENTERPRISE	
UK	€18K 1 deal	€296K 6 deals · 22% of total	€161K 1 deal · Wise	
NL	€30K 2 deals	€199K 6 deals · 15%	€95K 1 deal	
DE	€17K 1 deal	€141K 4 deals	—	
ES	€17K 1 deal	€151K 4 deals	—	
DK	€28K 2 deals	€49K 1 deal	€110K 1 deal	
SE	€29K 3 deals	—	—	
Total	€139K 10% of total	€836K 62% of total	€366K 27% of total	
Light = small concentration Dark = critical concentration				UK + NL + DE Mid-Market = 47% of total

SPEAKER NOTE Two findings reinforce: the quarterly pattern (four quarters of misses) and the segment concentration (Mid-Market is the cell). The current operating model treats Mid-Market and Enterprise the same; the data says they need different motions. This is a coverage/capacity story, not a blame story — and it's the frame that makes every recommendation on slide 4 line up.

→ If Mid-Market is where the money lives, three frictions explain why the deals there aren't closing.

Three frictions are slowing the deals already in play — silence, slippage, and a contracting bottleneck

Each lives in a different part of the funnel and needs a different owner. Wrong-owner intervention kills the recovery.

- **Silence · 34 deals worth €1.34M with no AE activity in 30+ days**

Wise · €161K · 85 days silent is the largest single exposure. 6 of 16 reps logged zero activity in the last 4 weeks — and 5 of those 6 own at least one stale deal. Owner: UK Sales Lead. This is a sales motion failure, not a marketing one.
- **Slippage · close-date push-out rate jumped from 0% → 19% in four months**

9 deals worth €405K had their close date pushed in May alone. Reps are no longer committing to dates — so the weighted forecast moves week-to-week. Owner: VP Sales · tight close-date discipline in forecast calls.
- **Contracting · all 3 deals stuck >90 days at €110K weighted**

Money frozen at the finish line. This is a legal/procurement issue, not a sales issue — the wrong owner won't move it. Owner: Deal Desk + Legal escalation.

PIPELINE FUNNEL · GROSS & WEIGHTED ARR BY STAGE47 deals · €1.83M gross · €534K weighted

☐ Gross ARR☒ Weighted ARRContracting · €110K weighted, all 3 stuck

SLIPPAGE RATE · LAST 6 MONTHS

0% → 19% in 4 months. The single fastest-deteriorating trend in the dataset.

REPS · ACTIVITIES LOGGED · LAST 4 WEEKS

K. Nguyen	0	E. Lindqvist	0	C. Rossi	0	S. Andersen	0
F. Jacobs	0	P. Van Berg	0	S. Muller	1	O. Svensson	1
I. Garcia	1	A. Kowalski	1	M. Eriksson	1	N. Walsh	1
J. Patel	1	T. Brauer	2	L. Dubois	2	N. Weber	3

6 of 16 reps logged zero. The activity-zero set overlaps the stale-deal set 1-for-1 — that's the systems argument.

SPEAKER NOTE The three frictions live in three different parts of the funnel. The wrong owner kills the recovery: a sales motion won't unstick Contracting (legal does); a marketing campaign won't fix silence (a rep manager does). The activity-zero overlay is the cleanest proof that the team isn't being lazy — they're sitting on stale pipeline with no urgency signal. Fix the signal; the activity follows.

→ Knowing where the frictions are, the executable plan is five named actions across two time horizons.

Five named actions, two time horizons — Mid-Market is the lens through which all five align

Decide today; assign owners before leaving the room. The plan compounds: Q2 capture, Q3 protection, H2 structural reset.

This week

DECIDE BY FRIDAY

2 actions

● URGENT · Q2 CAPTURE

Manager touch on Wise · J. Patel · UK Enterprise

€161K · 85 days silent · largest single exposure. UK Sales Lead picks up the phone, not the AE. If we lose Wise this quarter we eat a 50% additional gap.

€161K at-risk

UK Sales Lead

● URGENT · FORECAST TRUST

Open Q2 contingency review with Finance — flip RAG to RED

The €34K residual gap after weighted-pipe and upside lands is a re-baselining conversation, not a sales push. Open the H2 quota dialogue now.

€311K target

CRO

This sprint · 45 days

OWNED AND TRACKED WEEKLY

3 actions

● MID-MARKET INTERVENTION

UK + NL Mid-Market re-engagement sprint — 12 stale deals, €495K

Block AE diaries for opp reviews on the 12 cells representing 37% of all stale ARR. Manager-led, deal-by-deal, exit criteria locked at each stage.

~€12K Q2 capture

UK + Benelux Sales Leads

● AUTOMATION

Weekly stale-deal alert + Contracting escalation

Auto-flag every open opp with no activity ≥30 days. Separate flow auto-escalates stuck-at-Contracting deals to Deal Desk + Legal. Source already in `fct_pipeline_health.is_stale`.

+€22K recovered

RevOps

● PROCESS

Lock CRM picklists · segment / market / source / stage

`segment_raw` has 11 values for 3 canonical segments. Lock it now; unlock the H2 re-baseline conversation with Finance using clean data.

Forecast trust

RevOps + Sales Ops

SPEAKER NOTE Resist a sixth action — every micro-insight in the dashboard could be one, and we've deliberately chosen the five with the highest leverage. The Mid-Market sprint is the central bet; the other four set it up (urgent), unblock it (Contracting escalation), automate it (stale alert), and clean its base data (picklist lock). The decision in this meeting is who owns each line and what success looks like in 45 days.

→ Five actions in 45 days deliver ~€22K of capture, protect €1.34M of Q3 pipeline, and reset the forecast. The slide-5 ask names what we need from this room to make that real.

Decision asked of this room: sign off on the five actions and open the H2 re-baseline with Finance

Q2 capture is modest. The compounding wins are forecast trust, a Mid-Market motion that scales, and a sourcing mix the company can plan against.

Q2 · 45 DAYS

+€22K

Recovered ARR from re-engaging 34 stale deals.
Conservative floor (€654K × 15% × 22%).

HIGH CONFIDENCE

Q3 · ROLLING

€1.34M

Stale pipeline kept in the forecast instead of silently rolling out. **This is the real prize** — capture is small, protection is large.

MEDIUM CONFIDENCE

THIS SPRINT

Forecast trust

CRM picklist lock removes recurring reconciliation cost and gives Finance a clean baseline for the H2 re-quota conversation.

HIGH CONFIDENCE

NEXT PLAN CYCLE

Sourcing re-mix

Partnerships ASP €93K vs SDR/AE Outbound €32K. Capacity should shift toward inbound + partnerships. *Standing recommendation — separate analysis.*

FUTURE CYCLE

ASP BY DEMAND SOURCE · ALL-TIME CLOSED-WON

18 deals total

Partnerships		€93K · 5 deals
Marketing		€68K · 5 deals
SDR Outbound		€32K · 5 deals
AE Outbound		€32K · 3 deals

DECISION · SIGN-OFF TODAY

Five actions, two horizons, owners assigned before this meeting ends.

1

UK Sales Lead picks up the phone on Wise — this week.

2

CRO opens H2 quota re-baseline with Finance — this week.

3

UK + NL Sales Leads run the Mid-Market re-engagement sprint — 45 days.

4

RevOps ships the stale-deal alert + Contracting escalation — 45 days.

5

RevOps + Sales Ops lock CRM picklists — this sprint.

STANDING RECOMMENDATION

Move SDR capacity toward Partnerships / Marketing for next plan cycle. Separate analysis — not asked of this meeting.
